Program Name

Practice/Department/
Program Name

Remote Treatment of Entity Names

On promotional products, whenever an entity name such as a practice, department or program identifier is used in conjunction with the Prisma Health logo, its distance from the logo must not be less than half of the width of the logo, below the word "Health."

The remote entity must be in the Verdana bold font at a reasonable point size subservient in weight to the logo.

Cylindrical products, such as pens and cups, should offer imprint capability around the products, thus allowing the Prisma Health logo to be imprinted on one side and the entity designation on the other. It is always best, whenever possible, to have entity identifiers as remote as possible from the Prisma Health logo.

As imprint space allows, the preferred version of the logo is the stacked (vertical) orientation.

Please refer to approved vendor list when ordering promotional products; you may contact Prisma Health Marketing and Communications for the approved vendor list. Ordering from an unauthorized vendor is prohibited.
